In this video I show you what to do with the activation code on your Cisco Pix. I have a license for it and a pix using the cisco activator. The video will be followed by a series of questions that you can find on the internet. If you find my answers using the internet, then there is a good chance that you are on the right track. Cisco PIX Security Appliances integrate a broad range of advanced firewall services, range from standards-based site-to-site VPN using the Internet Key Exchange. Combines Cisco product quality with no moving parts to provide a highly A. You need to start a Cisco PIX key detection program on all your pix to determine if the key is running. If you have a compatible cisco PIX key detection program, install it. If you do not have a compatible key detection program, it is very easy to obtain. First, determine what version of the PIX is in use by reading the serial number at the bottom of the pix. Second, find the Cisco pix compatible key detection software, usually you can find this in Cisco IOS-XR. To start, download the software from: To download the cisco PIX 0cc13bf012
