SKU:SKU0990111975 \$10.00 Qty: Notes on Illustration: SPARTAN KAOS MODELS ARE SOLD SEPARATELY. FABRIKA DID NOT INCLUDE ORGELIGHT WEARING IN THE SCENARIO SELF CONTAINED SHIRT CODE. Product Reviews Default product rating: 5 of 5 on average, from 1 reviews This expansion was pretty good. The new missions give more information and objectives for your individual action, for example. With the new scene of the surface area, the gameplay is actually better. However, the expansion didn't offer so many types of weapons as I expected. But the ones that were presented were good-quality. Shawn, Raytown, MO, United States It's probably worth the money, though It could be a little better with more custom slots and better weapons. Zk, The Heights, MO, United States This is the best expansion to the game. Very good for players new to this game and even good for those of you who know the rules. Their are 2 new maps, new missions including engineer sabotage, new rules including new weapons and more equipment left for your squad to upgrade. Rachel, General Mills, MN, United States IMO its not the best expansion, but it's still up to par with the original SP game. I would get this if you like the euro game. Simon, New York, NY, United States I wish the Engineer missions on the temperate and tropic maps were extended to include irrigation projects and bridges. Also i wish it included more boarding upgrade Equipment on the lower levels of the torpedo ship. Unfortunately none of these was included in expansion 2. Ray, Keesler AFB, Mississippi, United States I like this expansion better than first one. The missions are not as difficult as first expansion and they are good. Rudi, Los Alamos NM, United States This will get there, but there is a lack of weapon slots, I am serious, they are 1 to 2 per squad. So no slot which you can specialize on the Relay. All of my troops had 1-2 P-26's in the sniper slot, and never saw the sniper versions of the P-26 in a game.// @flow import { getCurrent
