History AutoCAD has been developed for more than 30 years, starting in 1989 as a CAD system and evolving to support other platforms such as Windows. Today AutoCAD has many of the features that users expect from other CAD systems. As time went on, the AutoCAD product line expanded to include other platforms, including the ability to operate in the cloud using Microsoft Office 365 or as a native Windows application using Microsoft Windows 7. The AutoCAD product line grew from AutoCAD 2000. AutoCAD 2007 and AutoCAD 2008 were the first releases to be released for Microsoft Windows. Autodesk upgraded AutoCAD to run on Windows 7 in 2014. In 2017, Autodesk announced a partnership with Microsoft and plans to release AutoCAD version 2020 in Microsoft's early access program. Products AutoCAD, as a CAD product, is designed to perform functions such as: Create and edit geometry Track drawing objects, using the software's ability to track the path of the objects' transformation. Project Transform objects using mathematical transformations Plot Create geometry for plotting with direct and indirect methods of plotting Support for AutoCAD's DGN file format. The product line also includes support for other platforms such as Windows, Linux, and OS X. AutoCAD is delivered as part of the AutoCAD Subscription product that includes additional functions such as maintenance updates, OEM updates, and 3D modeling tools. Features AutoCAD 2020 includes new 3 ca3bfb1094

Markup and markup assist let you draw, edit, and annotate in a new way. Markup Import lets you import paper templates into drawings, so you can draw on the template without printing. Markup Assist gives you instant feedback on the drawings you make, even without annotating drawings. Make changes on the fly, and see the changes you made instantly. Better documentation of your work: Create and share software documentation—what AutoCAD calls Technical Papers. Send natively to the web—share your Technical Papers directly on the web, without a web server. Set up direct links to Technical Papers you publish to the web. You can export Technical Papers and send to a web server. You can now use regular captions for all Technical Papers. Reworked formatting in Technical Papers: Technical Papers have a single style—and its formatting is based on your document style. Attachments are shown in an enclosed box that you can choose to display or hide. A search box helps you find Technical Papers by their file name, keywords, or abstract. Technical Papers can now be used for training content. Enhanced formatting of section headings: Section headings now include formatting options for capital letters, bold text, and underlining, with the ability to control spacing and font size. Group sections together with captions and section borders. Presentation style of Technical Papers: Convert an existing paper document style into a presentation style for Technical Papers. (video: 1:00 min.) Help a Microsoft-based author: Easily import Adobe-based presentations, such as Keynote and PowerPoint, into a Technical Paper. Import Microsoft-based presentations into AutoCAD with a single command. Repurpose workflows to create Technical Papers: Create new types of Technical Papers—create Technical Papers that look like the old Technical Drawings (TDs). Create Technical Papers from existing material—convert an existing paper document into a Technical Paper. Export existing technical material to a Technical Paper. Create and manage Technical Papers in your My Profile. Microsoft Office integration for Technical Papers: Make presentations from AutoCAD drawings that include Technical Papers, and send the presentations directly to a web server. You
